Christophe GRENIER <grenier@cgsecurity.org>

<https://www.cgsecurity.org>

TestDisk is free data recovery software designed to help recover lost partitions and/or make non-booting disks bootable again when these symptoms are caused by faulty software, certain types of viruses or human error. It can also be used to repair some filesystem errors.

Information gathered during TestDisk use can be recorded for later review. If you choose to create the text file, `testdisk.log`, it will contain TestDisk options, technical information and various outputs; including any folder/file names TestDisk was used to find and list onscreen.

Use arrow keys to select, then press Enter key:

```
> [ Create ] Create a new log file
[ Append ] Append information to log file
[ No Log ] Don't record anything_
```

TestDisk is free software, and
comes with ABSOLUTELY NO WARRANTY.

Select a media and choose 'Proceed' using arrow keys:

Disk \\.\PhysicalDrive0 - 512 GB / 476 GiB - SKHynix_HFS512GDE9X081N

>Disk \\.\PhysicalDrive1 - 31 GB / 28 GiB - HP USB Flash Drive

>[Proceed] [Quit]

Note: Serial number 027F01C84010

Disk capacity must be correctly detected for a successful recovery.

If a disk listed above has an incorrect size, check HD jumper settings and BIOS
detection, and install the latest OS patches and disk drivers.

Disk \\.\PhysicalDrive1 - 31 GB / 28 GiB - HP USB Flash Drive

Please select the partition table type, press Enter when done.

```
>[Intel ] Intel/PC partition
[EFI GPT] EFI GPT partition map (Mac i386, some x86_64...)
[Humax ] Humax partition table
[Mac ] Apple partition map (legacy)
[None ] Non partitioned media
[Sun ] Sun Solaris partition
[XBox ] Xbox partition
[Return] Return to disk selection
```

Hint: Intel partition table type has been detected.

Note: Do NOT select 'None' for media with only a single partition. It's very rare for a disk to be 'Non-partitioned'.

Warning: the current number of heads per cylinder is 255
but the correct value may be 128.

You can use the Geometry menu to change this value.

It's something to try if

- some partitions are not found by TestDisk
- or the partition table can not be written because partitions overlap.
